Created & managed YouTube channel with technical side of content creation, enhancing communication skills overall
[View](#)

Full-stack engineer with 3+ years of professional experience building scalable SaaS products across fintech, healthcare, and enterprise domains

EXPERIENCE

BRAINERHUB SOLUTIONS | SOFTWARE ENGINEER

Ahmedabad, Gujarat | May 2025 – Present

Project 1 — Enterprise EHS/ESG SaaS Platform

- Engineering features for a multi-tenant enterprise SaaS platform spanning EHS (Environment, Health, Safety), ESG, Risk, and Compliance management.
- Built backend on a distributed microservices architecture behind an API gateway, with a micro-frontend UI layer, leveraging MongoDB and Neo4j DB.
- Integrated NATS as low-latency messaging backbone for event-driven inter-service communication, improving throughput and decoupling services.
- Implemented real-time chat with Socket.IO, including voice-input data sharing for instant, low-latency user responses.

Project 2 — Fintech SaaS Platform

- Architected an end-to-end fintech SaaS application (Next.js full-stack) with an automated CI/CD pipeline, cutting deployment time by 60%
- Integrated Gemini AI into an in-app assistant, giving users instant AI-generated summaries of pending work, task details, and client insights.
- Built a Stripe subscription billing system (Free / Pro / Team tiers) with region-specific tax compliance (Canada) and automated invoicing.
- Consolidated API and data layers into a unified Next.js codebase, reducing cross-team onboarding time by 30%.

YUDIZ SOLUTIONS | WEB DEVELOPER

Ahmedabad, Gujarat | Dec 2024 – Apr 2025

- Led frontend development of an event-listing platform and admin portal, streamlining 5+ concurrent event workflows.
- Delivered core features for a ticketing platform — payment processing and analytics dashboards — supporting 1,000+ ticket transactions.
- Built automated barcode scanning for ticket validation, cutting check-in time by 50% and reducing queue wait times.

ARSENALTECH | SOFTWARE ENGINEER

Ahmedabad, Gujarat | Apr 2024 – Nov 2024

- Led frontend architecture for the Bering Health patient portal, serving 10,000+ users with performant React/Next.js experiences.
- Built multi-step patient onboarding with embedded video consultations, reducing drop-off by 25%.
- Engineered an API integration layer using Redux Toolkit and custom React hooks, cutting state-management bugs by 40%.

GLOBALVOX | SOFTWARE ENGINEER

Ahmedabad, Gujarat | Feb 2023 – Mar 2024

- Developed the backend for a real-time online auction platform, powering dynamic pricing and live bidding workflows.
- Designed core auction mechanics with member-exclusive workflows, enabling sub-200ms bid-transaction response times.
- Built a scalable Node.js backend with Redis caching and Socket.IO, supporting live bid updates across 100+ simultaneous auction rooms.
