EXPERIENCE

BRAINERHUB SOLUTIONS | SOFTWARE ENGINEER

Ahmedabad, Gujarat | May 2025 – Present

- Architected an end-to-end fintech platform serving financial advisors across 3+ client portfolio tiers, reducing manual transaction processing time by 40%
- Integrated Stripe payment gateway and DocuSign-style electronic signature, cutting document turnaround from days to under 2 hours
- Launched a Next.js full-stack application with automated CI/CD pipeline, reducing deployment time by 60% and eliminating manual release errors
- Consolidated API logic and database setup into a single Next.js codebase, decreasing cross-team onboarding time by 30%

YUDIZ SOLUTIONS | WEB DEVELOPER

Ahmedabad, Gujarat | Dec 2024 – Apr 2025

- Led frontend development of an event listing platform and admin portal, increasing admin task efficiency for 5+ concurrent event workflows
- Delivered core features for Booklit ticketing platform – payment processing, analytics dashboards – supporting 1,000+ ticket transactions
- Introduced automated barcode scanning for ticket validation, cutting check-in time by 50% and reducing queue wait times
- Optimized server-side rendered event booking site with Next.js and React, improving page load speed by 35%

ARSENALTECH | SOFTWARE ENGINEER

Ahmedabad, Gujarat | Apr 2024 – Nov 2024

- Spearheaded frontend architecture for Bering Health patient portal, serving 10,000+ users with seamless React and Next.js experiences
- Built multi-step patient onboarding flows with embedded video consultations, reducing drop-off rate by 25% and improving admin visibility
- Implemented API integration layer using Redux Toolkit and custom React hooks, cutting state management bugs by 40%
- Established code quality standards and PR review practices, reducing post-release defects by 30% across a team of 4 engineers

GLOBALVOX | SOFTWARE ENGINEER

Ahmedabad, Gujarat | Feb 2023 – Mar 2024

- Delivered full-stack development for Bigdeal auction platform and Bridge Invest financial portal, handling 500+ concurrent users
- Designed core auction mechanics with member-exclusive workflows, enabling real-time bidding with sub-200ms transaction response times
- Built a scalable Node.js backend with Redis caching and Socket.io, supporting live bid updates across 100+ simultaneous auction rooms

PERSONAL PROJECT

SALES DASHBOARD | FULLSTACK (MERN)

Live Demo

- Developed comprehensive admin dashboard for e-commerce operations, featuring real-time sales analytics, customer management, and transaction tracking with interactive data visualizations
